Thiruvananthapuram, Kerala, India | +91 9567907541 | abhijithuv6@gmail.com
Portfolio: <https://abhijith2198.github.io/portfolio/>

PROFESSIONAL SUMMARY

Builds things end to end, from an autonomous landmine detector running ROS on Raspberry Pi to a fitness app UI across 20+ screens in Figma. M.Tech in Robotics and Automation and a B.Tech in EEE, with a certified UX/UI background and working knowledge of HTML, CSS, and Python.

SKILLS

- UI/UX Design: UI Design, UX Design, Wireframing, Prototyping, User Flows, Interaction Design, Design Systems, Information Architecture
- Graphic Design: Branding, Logos, Posters, Social Media Graphics, Typography, Layout, Illustration
- Design Tools: Figma, Adobe Illustrator, Blender 3D
- Development: HTML, CSS, Python, Embedded C | Engineering: AutoCAD, Electrical CAD, Primavera P6
- Robotics & Hardware: Robot Operating System (ROS), Raspberry Pi, Arduino, Lidar, Sensor Integration

WORK EXPERIENCE

Freelance UI/UX Designer

Aug 2025 – Jul 2026

Self-employed | Remote | Client details under NDA

- Designed mobile app interfaces for client projects end to end, from user flows and wireflows through high-fidelity screens and interactive prototypes in Figma.
- Defined interaction patterns and prototype behaviour for developer handoff.

UX/UI Design Intern

Mar 2026 – Jun 2026

Zoople Technologies, Kochi | Remote

- Designed 20+ app screens and user interfaces in Figma, improving visual consistency across the product.
- Built interactive prototypes that streamlined 5+ key user flows, cutting design-to-development handoff time.
- Collaborated with a cross-functional team of 4 developers to align designs with technical requirements.

PROJECTS

RepUp – Fitness Mobile App

Mar 2026 – Jun 2026

- Designed a fitness tracking app UI across 20+ screens for workout logging and progress monitoring.

Meridian – Curated Travel Website

Jun 2026

- Designed a curated travel website end to end in Figma, from homepage to editorial journal pages.
- Built a reusable design system of type scale, colour tokens, and components.

Zomato – Information Architecture & User Flow Redesign

May 2026

- Restructured the app's information architecture and redesigned key user flows from a UX audit.

Autonomous Landmine Detector – M.Tech Thesis

Jul 2024 – Aug 2024

- Developed an autonomous landmine detection system using Raspberry Pi, Arduino, ROS, and Lidar for ground navigation.
- Paired a metal detector with an IR sensor that confirms a landmine from its thermal readings.

Self-Balancing Autonomous Electric Vehicle – B.Tech Project

Mar 2021 – Jul 2021

- Built a self-balancing autonomous EV from an electric hoverboard with GPS, Lidar, radar, and ultrasonic sensors; on command it locates the user and drives to them avoiding obstacles.

EDUCATION

M.Tech, Robotics and Automation

2022 – 2024

College of Engineering Trivandrum | 77.00%

B.Tech, Electrical and Electronics Engineering

2017 – 2021

Mahaguru Institute of Technology | 83.20%

CERTIFICATIONS

UX/UI Design Course – Intellipaat, Bangalore

Nov 2025 – Jan 2026

AutoCAD, Electrical CAD, and Primavera P6 – CADD Centre
